

Missouri Capital Asset Advantage Treasury

Principal Stability Fund Ratings Definitions

AAAm A fund rated 'AAAm' demonstrates extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. 'AAAm' is the highest principal stability fund rating assigned by S&P Global Ratings

AAm A fund rated 'AAm' demonstrates very strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. It differs from the highest-rated funds only to a small degree.

Am A fund rated 'Am' demonstrates strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk, but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than funds in higher-rated categories

BBBm A fund rated 'BBBm' demonstrates adequate capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. However, adverse economic conditions or changing circumstances are more likely to lead to a reduced capacity to maintain principal stability.

BBm A fund rated 'BBm' demonstrates speculative characteristics and uncertain capacity to maintain principal stability. It is vulnerable to principal losses due to credit risk. While such funds will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

Dm A fund rated 'Dm' has failed to maintain principal stability resulting in a realized or unrealized loss of principal.

Plus (+) or Minus (-)
The ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Distributor	PMA Securities

Portfolio Composition as of September 29, 2022

BANK - Bank Deposits; ABS - Asset-backed security; CP - Commercial Paper; TREAS - Treasury; GOV-AGCY - Agency and Government; REPO - Repurchase Agreement

Rationale

S&P Global rates the Missouri Capital Asset Advantage Treasury 'AAAm'. This rating is based on S&P Global's analysis of the pool's credit quality, market price exposure, and management. The rating signifies our forward-looking opinion about a fixed-income fund's ability to maintain principal value (i.e., stable net asset value, or 'NAV'). This is accomplished through conservative investment practices and strict internal controls. The pool is monitored on a weekly basis by S&P Global.

Overview

MOCAAT, a cash management program exclusively for Missouri School Districts, political subdivisions, and municipalities, is a portfolio series within the Missouri Capital Asset Advantage Treasury that was established in September 2020. The pool's investment objective is first to preserve capital, second to maintain liquidity, and third to provide the participants a competitive investment yield.

MOCAAT is governed by the board of directors pursuant to an Intergovernmental Cooperation Agreement, and the board has full power, control, and authority over the affairs, investments, and assets of the pool.

Management

The pool's investment adviser is PMA Asset Management, LLC, a registered investment adviser focused on serving the investment needs of public entities, insurance companies, and institutional investors in the United States. As of September 30, 2022, PMA Asset Management had over \$19.9 billion in assets under management. In addition to MOCAAT, PMA Asset Management also serves as investment adviser for 10 other 'AAAm' rated local government investment pools. UMB Bank N.A. serves as custodian for the trust pursuant to a custodian agreement. PMA Financial Network LLC

is the administrator, and PMA Securities LLC is the distributor.

Portfolio Assets

To obtain its investment objective, the Liquid Series of MOCAAT invest in permitted investments that maintain a stable net asset value of \$1.00. Specifically, the pool invests in a diversified portfolio of U.S. Treasury securities, agency securities, repurchase agreements, collateralized bank deposits, bankers' acceptances, commercial paper, and any other type of investment permitted. The pool seeks to maintain a weighted average maturity of 60 days or less and a weighted average life of 120 days or less. In our view, a portfolio's weighted-average maturity is a key measure of a portfolio's tolerance and sensitivity to rising interest rates.

Principal Stability Rating Approach and Criteria

A S&P Global Ratings principal stability fund rating, also known as a "money market fund rating", is a forward-looking opinion about a fixed income fund's capacity to maintain stable principal (net asset value). When assigning a principal stability rating to a fund, S&P Global Ratings analysis focuses primarily on the creditworthiness of the fund's investments and counterparties, and also its investments' maturity structure and management's ability and policies to maintain the fund's stable net asset value. Principal stability fund ratings are assigned to funds that seek to maintain a stable or an accumulating net asset value.

Generally, when faced with an unanticipated level of redemption requests during periods of high market stress, the manager of any fund may suspend redemptions for up to five business days or meet redemption requests with payments in-kind in lieu of cash. A temporary suspension of redemptions or meeting redemption requests with distributions in-kind does not constitute a failure to maintain stable net asset values. However, higher rated funds are expected to have stronger capacities to pay investor redemptions in cash during times of high market stress because they generally comprise shorter maturity and higher quality investments.

Principal stability fund ratings, or money market fund ratings, are identified by the 'm' suffix (e.g., 'AAAm') to distinguish the principal stability rating from a S&P Global Ratings traditional issue or issuer credit rating. A traditional issue or issuer credit rating reflects S&P Global Ratings view of a borrower's ability to meet its financial obligations. Principal stability fund ratings are not commentaries on yield levels.
