FEATURED MARKET DATA

The Fed and a Government Shutdown

Lawmakers failed to reach an agreement by the end of the day on September 30, resulting in a government shutdown that has furloughed hundreds of thousands of government workers. There are at least three important pieces of information to know about a government shutdown. First, the Federal Reserve will continue to operate as normal. Second, markets have historically performed well during past government shutdowns. Third, a government shutdown is different than the debt ceiling limit, which risks a Treasury default. This government shutdown, which last occurred in 2018, has arrived at a unique time where the Fed is in the middle of a policy easing cycle and is in need of current data on labor and inflation. This data will be delayed as a result of the government shutdown.
